Time saving

Time is an essential success factor within the industrial sector and the MTPReel helps to save time due to its intuitive operation. The rapid but careful rewinding of the connector cable saves time, which your employees can dedicate to other things.

Operating error avoidance

Using the MTPReel will ensure that the operating device is assigned unambiguously to the operator. Lengthy searches for the correct plug-in piece and potential operating errors due to incorrect combinations are avoided.

Plant safety optimisation

Properly storing the connector cable in the MTPReel protects it from dirt and accidental damage, which significantly increases its service life and improves safety within the operational facility.

Patented and tested system – made in Italy

Our partner company in Italy manufactures the MTPReel to the highest quality standards.

Safety First

Hazardous situations, such as trip hazards or cable damage, are now a thing of the past.

Technical specifications

 Robot control	 Box size	 Extension length	 Cabinet connection	 Dimensions (mm)	 Weight (kg)
Visual 3	Large	25 m	6,5 m	450x225x384	9 kg

Large

The **MTPReel** is available for the **Bystronic** handheld operator.
